

MARK YOUR CALENDARS!

**6TH SNIS
International
Endovascular
Stroke Conference
(IESC)**

**MAY 1 – 3, 2017
NEW YORK, NEW YORK**

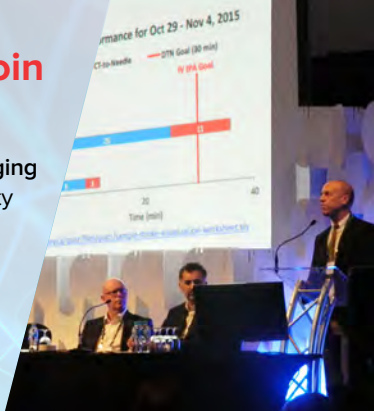

Mark your calendars now to join SNIS for the 6th IESC!

After a successful outing Down Under, SNIS is bringing the IESC back to the States. This is your opportunity to take part in what is fast becoming the most comprehensive offering for practitioners focused on the complexities that accompany neurointerventional stroke treatment.

This year's IESC will combine didactic sessions with filmed cases from six world-renowned stroke centers that will show best practices from patient arrival through thrombectomy procedure. An independent panel of experts will edit the cases and the local experts will walk you through the patient's care. An expert panel made up of Emergency Medicine, Stroke Neurology, Neurointerventional Surgery, Neuroanesthesia and Neurocritical Care will then lead audience discussion.

The didactic sessions intermingled throughout the cases will review current guidelines, ongoing research and future direction.

Co-Chairs: Michael Hill, MD;
Edward Jauch, MD; Aquilla Turk, DO

More details
will be posted on
www.snisonline.org
as they become available.

**We look forward to seeing
you in New York!**
